

Dear Doctor & Hiring Manager,

Thank you for taking the time to read this, my name is Sylvie Wrobel and I am a truly passionate, devoted Dental Hygienist. For the past two years I've acquired an infinite amount of clinical dental hygiene experience, working with some of the most skilled dentists and dental specialists who know how important it is to have the right hygienist on your team. So, I know your next question, what sets me apart from other dental hygienists?

I've carefully structured ways to interact with all patients from young children to geriatrics within the first 10-15 minutes of our re-care appointment by quickly alleviating and eliminating their fears, worries, post dental traumatic experiences, dental treatment financial concerns, and other hesitations that could get in that way of what really needs to be addressed; like their OHI routine, mild-advanced gum disease, smoking cessation, diet & health, and completing their treatment plan in affordable phases so that patients feel like they're winning! I have been blessed by some of the greatest doctors to have experience in all clinical aspects of dental hygiene and am looking for a doctor and team that have the same passion.

What sets me apart from other Dental Hygienists?

- Have experience as a Dental Hygienist for multiple offices at two different practices, which has given me a broader range of experience, quickly, and the ability to adapt to different office and Dentist philosophies & methodologies.
- Regularly earn trust from problematic patients and assist in completing complicated treatment plans within 1-2 appointments.
- Experience in anesthetizing the doctor's restorative patients and assisting team members in-between patients to keep the office running on-time and efficiently.
- Work well with Specialty Doctors including Cosmetic Dentists, Periodontists, Endodontists, Pedodontists and Orthodontists.
- Regularly save patients from leaving due to SEVERE Dental Anxiety.
- Modify my cleaning time so Doctors can gain production and the patient can get all of their treatment done in one day, quickly, thoroughly and pain free.

Dental Hygiene Goals for 2018!

1. Looking for a stable dental hygiene FT position, 3-4 days a week.
2. To complete 3 DH volunteer opportunities (2nd year volunteering for *Mission of Mercy*).
3. Continue to stay up to date with the latest dental news / scientific research and new dental technology through Continuing Education. I'm concluding the final research details on a possible non-pharmaceutical Smoking Cessation option & plan that will be more "safe" for patients to use.

Compensation: Flexible

Availability: Monday – Friday

I'm available to volunteer a half day's work to get acquainted with the office workflow & equipment. It also gives us both a chance to ask & answer any questions. By shadowing your current hygienist, I will be able to create a smooth transition and build a solid working doctor-hygienist relationship right out of the gate. I'm looking forward to hearing from you soon and finding my new dental home!

Very Best Regards,

Sylvie Wrobel, RDH

SYLVIE MARIA WROBEL, RDH
